REQUEST FOR CORRECTED FILING RECEIPT

Sir:

In reviewing the filing receipt (copy attached) for the above referenced application, Applicants note that one of the inventors, Randy D. Wilkinson, does not appear on the filing receipt. Attached is a copy of the Declaration and the Application cover sheet including this inventor. Also, Applicants note that "United Kingdom" appears after the address of Julian Mullaney and should be deleted.

Applicants note that the title appears as follows: Terminal blocks and methodd for making and breaking connections in a telecommunications conductor. The word "methodd" should be --methods--. The correct title, as listed on the application (first page attached), should read: Terminal blocks and methods for making and breaking connections in a telecommunications conductor.

Applicants request that a new filing receipt be issued.

Finally, Applicants note that a Petition under 37 C.F.R. § 1.48, a Verified Statement of Facts Under 37 C.F.R. § 1.48; Consent of Assignee to Change Inventorship Under 1.48; and Declaration and Power of Attorney, to add Eric Emmanuel Alston as an inventor, are filed as of the same date as this Request for Corrected Filing Receipt.

## **TERMINAL BLOCKS AND METHODS FOR MAKING AND BREAKING CONNECTIONS IN A TELECOMMUNICATIONS CONDUCTOR**

### **Field of the Invention**

5 The present invention relates generally to telecommunications and, more particularly, to connecting devices and methods for connecting telecommunications conductors.

### **Background of the Invention**

10 Terminal blocks are used by telecommunications companies to connect connector wires of a multi-core cable to service wires that extend to customer residences or places of business. Such terminal blocks are typically mounted outdoors and are, thus, exposed to environmental conditions, such as rain, snow, sleet, ice, temperature fluctuations, dirt, insect infestation and similar conditions that may adversely affect the electrical connections between the service wires and the electrical connectors. Thus, some form of sealant material may be provided in  
15 such terminal blocks.

Referring now to the schematic illustration of FIG. 1, a typical telephone company (Telco) telecommunications conductor cable 20 extends from the Telco central office 22 to feed pedestals in a neighborhood or neighborhoods. The Telco telecommunications conductor cable 20 may include as many 900 or more pairs of  
20 telecommunications conductor wires. At a splice 24, one or more of the pairs of
